EDUCATION

University of California San Diego (UCSD)

Sep. 2023 – Jun. 2027 (Expected)

B.S. in Data Science, Minor in Mathematics | GPA: 3.9/4.0 | Provost's Honors

La Jolla, CA

Relevant Coursework: Machine Learning, Optimization, Probability & Statistics, Data Visualization, Data Science Foundations, Database Systems, Data Structures & Algorithms, Linear Algebra, Graph Theory.

SKILLS

Technical Skills: Machine learning, data visualization, predictive modeling, geospatial analysis, cloud computing, and web development using Python, SQL, JavaScript, TensorFlow, PyTorch, Tableau, Streamlit, and Google Cloud.

Soft Skills: Creative problem solving, data storytelling, leadership, collaboration, mentoring, marketing and digital design.

EXPERIENCE

DataHack 2025 — Jean-o-type

Apr. 2025

Python, TensorFlow, React

San Diego, CA

- Developed **Jean-o-type**, an AI web app that classifies jean styles and decades to reveal fashion trends.
- Trained a **ResNet-50** on 4.8k images, achieving **88% top-3 accuracy** and ± 3 -year decade prediction.
- Built an interactive **Streamlit** site for photo uploads, instant predictions, and visual trend analytics.

Machine Learning Challenge

Jan. 2025

NSF HDR iHARP: Detecting Sea Level Rise Anomalies | Python, Pandas

San Diego, CA

- Analyzed 20 years of **sea-level data** (7,000+ observations), improving anomaly detection accuracy by 15% through effective data preprocessing and cleaning.
- Implemented a **Random Forest model**, improving extreme event prediction accuracy by 20% by optimizing **feature selection** and fine-tuning model parameters.
- Automated **data cleaning** in **Python** and **Pandas**, reducing preprocessing time by 30%.

DiamondHack Hackathon — Search and Rescue Website

Apr. 2024

Frontend Developer | HTML, CSS, JavaScript

San Diego, CA

- Designed a **search-and-rescue platform** to help responders locate victims faster during disasters.
- Built the main UI with **HTML/CSS/JavaScript**, focusing on clarity, accessibility, and rapid response.
- Collaborated in a 48-hour hackathon to prototype an intuitive tool for **life-saving coordination**.

PROJECTS

IsleNet — Disappearing Island Detection & Risk Modeling

June 2025 - Present

- Selected as UC San Diego's **HDSI Undergraduate Research Scholars** to conduct independent data science research.
- Beginning development of **IsleNet**, a project using satellite imagery and remote sensing to detect island shrinkage and model environmental risk.
- Funded by a **\$2,500 research scholarship** recognizing innovation and potential in applying data science to environmental sustainability.

Age-Based Digital Divide Research — Equity in Access | Excel, SQL, Power BI

Sep. 2022 – May 2023

- Surveyed 60 elderly participants in China; performed cohort analysis and surfaced **barriers to digital services**.
- Built **Power BI** dashboards for 20+ stakeholders to inform **equitable policy** recommendations.

LEADERSHIP/EXTRACURRICULAR

Halicioğlu Data Science Institute (HDSI) — External Committee

Jan. 2025 – Present

Social Media and Marketing Coordinator

UCSD

- Lead **branding, marketing, and event promotion** for the HDSI student community of **1,000+ members**.
- Design **digital and print materials** (stickers, merch, social posts) to strengthen HDSI's student identity.

DataJam Mentor

Aug. 2024 - Apr. 2025

San Diego Supercomputer Center (SDSC)

San Diego, CA

- Mentored two high school teams in **data analysis** and **project development**, enhancing their technical skills.
- Led weekly meetings, enhancing project progress by providing structured feedback on **method** and **data storytelling**.

Women in Computing (WIC) / Society of Women Engineers (SWE)

Oct. 2024 – June 2025

EDGE Mentor

UCSD

- Mentor high school girls on **confidence, curiosity**, and translating ideas into **impactful tech projects**.
